

How to order

Following the acquisition of KUARIO by XMDS holding and its subsequent merger with Pecunda, we would like to provide you with a clear overview of the streamlined ordering process for both previous inepro items and KUARIO items.

With Pecunda's acquisition of inepro software, all software license requests must now be directed to Pecunda. Additionally, for KUARIO-related items, Pecunda has taken over the hardware aspect from inepro. Consequently, all orders for KUARIO hardware will be managed by Pecunda.

It's important to note that KUARIO subscriptions will continue to be processed through the KUARIO platform. Therefore, there is no requirement to place orders directly with KUARIO, as the platform handles invoicing directly. To ensure smooth processing for your finance department, you have the option to include your PO reference number when activating a KUARIO subscription. This reference number will then be incorporated into the invoice for your records.

Ordering inepro software licenses, consultancy services and KUARIO hardware
