

KUARIO

THE PRINT REVOLUTION FOR PUBLIC MULTIFUNCTION PRINTERS

*Self service webshop
for public printing,
copying and
scanning.*

MFP Kiosk application

In a growing world of self-service kiosks, KUARIO offers a multi-kiosk solution for multifunction printing, vending, coffee and other self-service machines.

Deploying your unattended multifunction printers (MFP's) in (semi-)public environments i.e. coworking & shared offices, universities, libraries, supermarkets, hotels & post offices etc. can be a real challenge. Operating the device can be very complicated. Extensive registration might deter users. And the setup of a complex document accounting system can be experienced as too much hassle.

Revolutionize printing

To avoid all these obstacles KUARIO developed the MFP Kiosk application. The MFP Kiosk app transforms the MFP into a 'web shop'. It's easy to use design enables a straight forward order & payment process. With the KUARIO MFP Kiosk users can walk up to the MFP and print documents or photos, make copies, scan or send a fax using the 'shopping cart' just like a web shop.

The MFP Kiosk app offers a revolutionary new way of mobile printing. KUARIO turns the smartphone into an intelligent hub by scanning a QR code on the MFP display. All documents available on the phone or any cloud storage (Office 365, OneDrive, Google Drive, Dropbox, iCloud etc.) can be printed directly at the MFP.

Print

- Serverless print
- Global pull print, secure release
- USB pen drive
- KUARIO Global Printer Driver
- Microsoft Universal Print
- Mobile print
- Cloud print
- Stapling Hole punching

Copy

- Easy copy mode
